PROJECTS

Smart Contact Manager | *Java Full-Stack Project*

- User-friendly registration system allows users to create their profiles, enabling them to add, delete, update, and search contacts in their personalized contact management section.
- Integration of Spring Security and CSRF protection with Url securing enhances the application's security, allowing only authorized users to access and manipulate contact data.
- The project involves the use of the Model-View-Controller(MVC) architectural pattern. This separation allows for better organization, maintainability, and scalability of the codebase

Movix | *HTML, SCSS, JavaScript, React Js, Redux, API*

August 2022

- Developed "Movix," a responsive movie website using HTML, SCSS, JavaScript, React JS, and Redux, showcasing captivating UI design.
- Utilized APIs to dynamically fetch and display movie data, ensuring seamless user experience across various devices.
- Collaborated on seamless integration of Redux, optimizing state management for enhanced performance and scalability.
- Implemented SCSS for efficient styling, contributing to the visually appealing and cohesive design of the website.
